Software Engineer Intern – Full Stack | React.js | React Native | Node.js | Java | Python | REST APIs | MySQL | MongoDB | Git

PROFESSIONAL SUMMARY

Curious, collaborative, and driven Computer Science undergraduate with strong hands-on experience across all phases of the software development lifecycle — from design and development to testing, debugging, and deployment. Proficient in React.js, React Native, Node.js, Java, and Python, with solid experience building well-designed, testable, and efficient full-stack web and mobile applications. Committed to writing clean code, following secure coding practices, and continuously learning new frameworks, libraries, and industry best practices. Eager to contribute to innovative, real-world projects at a product engineering company and grow within a fast-paced, collaborative engineering team.

TECHNICAL SKILLS

Languages & Frameworks

- Node.js & Express.js: RESTful API design, middleware, authentication, server-side development
- React.js & React Native: component-based UI, hooks, state management, responsive and mobile-first design
- Java & Spring Boot & JAX-RS: OOP principles, MVC architecture, RESTful API development, backend service development
- Google Gemini API (@google/genai SDK): LLM integration, prompt engineering, dynamic prompt grounding, Generative AI application development
- Python: scripting, data processing, and analysis
- JavaScript (ES6+), HTML5, CSS3, Vite — modern web development standards

Software Development Practices

- Full software development lifecycle (SDLC): design, development, testing, debugging, and release of software components
- Writing well-designed, testable, and efficient code following clean code principles
- API testing and validation: Postman — request/response testing, environment management, collection management
- Secure coding practices: awareness of data protection, access controls, and secure API design
- Continuous improvement mindset: investigating alternative technologies and presenting solutions
- Agile methodology: iterative development, sprint cycles, stand-ups, code reviews, collaborative workflows

Databases

- MySQL: relational schema design, SQL queries, joins, data integrity
- MongoDB & PostgreSQL: NoSQL document management, CRUD operations, aggregation

Cloud & Tools

- Cloud platforms: Firebase, Supabase, Microsoft Azure (certified), Vercel (serverless deployment)
- Version control: Git & GitHub — branching, pull requests, collaborative team development
- Tools: VS Code, Postman, Figma — development, testing, and design tooling

PROJECTS

IIT Connect – Full Stack Mobile Application (Group Project)

React Native, Node.js, Express.js, MongoDB, REST APIs, Git

- Led implementation of Events & Announcements and Anonymous Reports modules across the full SDLC: React Native interfaces, REST APIs, MongoDB data operations with Node.js
- Participated in code reviews, Agile-style sprints, and resolved integration issues between frontend and backend components

AI Chatbot – Generative AI Full Stack Application

React, Node.js, Express, Google Gemini (gemini-2.5-flash), @google/genai SDK, Vite, Vercel

- Built a full-stack AI chatbot integrating the Google Gemini API via @google/genai SDK, deployed as a serverless function on Vercel with exponential backoff retry logic and dynamic prompt grounding
- Designed a glassmorphic dark-mode React frontend with real-time typing indicators, smooth animations, and visual error handling

Sales Order Management System – Full Stack Web Application

Java, Spring Boot, React, MySQL, Tailwind CSS

- Designed and developed a full-stack application using Java/Spring Boot and React, following MVC architecture and OOP principles; built and tested RESTful APIs and validated data integrity across MySQL

Smart Campus REST API – Java Backend

Java, JAX-RS, Grizzly HTTP Server, JSON, Postman

- Developed a RESTful API using Java and JAX-RS for managing rooms, sensors, and sensor readings; implemented full CRUD operations with JSON data handling and comprehensive Postman testing

Real Estate Web Application – React Frontend

React, Vite, JavaScript, JSON, HTML, CSS

- Built a high-performance SPA with global state management, drag-and-drop functionality, and dynamic property filtering using React and Vite optimized production builds

Traffic Flow Analysis System – Python Data Pipeline

Python, CSV Data Processing, Data Visualization

- Developed a Python program to ingest, parse, analyze, and visualize CSV traffic datasets — demonstrating scripting, debugging, and data analysis capabilities

Green Horizon – Environmental Awareness React SPA

React, Vite, React Router, JavaScript, CSS, Netlify

- Built a responsive SPA using React, Vite, and React Router featuring smooth page transitions, dynamic CSS scoping to prevent style bleeding, interactive volunteer feedback forms with validation, and a dynamic goal tracker dashboard

TaskFlow – Full Stack TODO Application

React 19, Vite, Node.js, Express.js, MongoDB, Mongoose, CSS

- Built a full-stack monorepo TODO app with React 19/Vite frontend and Node.js/Express.js backend using MongoDB/Mongoose; implemented a custom useTodos hook with optimistic UI updates and automatic rollback on error
- Delivered production-quality UX: search and filter, progress bar, toast notifications, dual-layer validation, keyboard shortcuts, and a glassmorphic dark theme following Controller-Route-Model backend pattern

EDUCATION

BSc (Hons) Computer Science (Undergraduate)

Sep 2024 – Present

Informatics Institute of Technology (University of Westminster, London)

Foundation Certificate in Higher Education

Sep 2023 – Apr 2024

Informatics Institute of Technology (University of Westminster, London)

Diploma in Computer Network Engineering

2018 – 2020

IDM Nations Campus

Edexcel International A-Levels / IGCSE O-Levels

2011 – 2023

Leeds International School – Galle

CERTIFICATIONS

- Professional Certificate in Java Programming (OOP) – IIT PDU
- Professional Certificate in Artificial Intelligence – IIT PDU
- Microsoft Azure Fundamentals: Azure Architecture & Services – Digital Certificate
- Git and GitHub Bootcamp – Digital Certificate
- Data Science with Python – Digital Certificate
- Diploma in Computer Network Engineering – IDM Nations Campus
- Java Object-Oriented Programming – Digital Certificate

VOLUNTEERING & LEADERSHIP

- Galle Literary Festival – Production Team Lead: coordinated team logistics and ensured on-time delivery
- Cutting Edge24 – Volunteer
- Senior Prefect & Junior Prefect | Head of Media Unit | House Vice In-charge
